

Daihatsu Columbus

The Daihatsu Columbus is a modern version of the classic mini-coachbuilt. Based on the new Daihatsu B300cc 16valve Hi Petrol Hijet pickup, it has a twin skinned GRP (Glass Reinforced plastic) body.

The motorcaravan conversion is reached via a rear door, opening on to the galley/washing area. The galley unit comprises a twin burner and a stainless sink plus an unexpectedly large area of work surface for the cook. A 3-way fridge is built on one side and roomy cupboards above and below complete the arrangement. The sleeping/lounging area features a well-sized, rear facing bed-settee which converts to a large double bed or two singles with ample storage in the hold beneath. There are two separate front facing rear dining seats. Two detachable tables complete the dining arrangement. A porta-potti comes as standard. The gas locker and battery have external access doors.

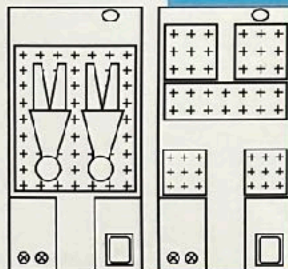

The comfortable upholstery is finished in luxury velour fabric (available in a choice of designs). The cupboards are finished with light oak effect panel door with brass push handles and hinges and are individually built here in our factory. Co-ordinating velvet curtains with tie-backs complete the informal design. Large picture windows to each side of the dining area and a large skylight/vent combine to give a light airy feel to the interior. There is additional storage for sleeping bags, etc. over the cab. This area can be turned into a bed for very small campers!

We have made a few improvements to our original Columbus which was launched this time last year after consultations with that front of wisdom for micro-motorhoming - The Bambi Club. These include an extra window, repositioning of the fridge, repositioning of the water tank and one-piece rear door.

SPECIFICATIONS

Base Vehicle: Daihatsu Hijet pickup van
Engine: 125cc Petrol, water cooled inline 4 cylinder 4 valve
Transmission: rear wheel drive, 5 forward 1 reverse gear
Overall Length: 3860mm

TEL: 01424 774414

The development of the two berth Daihatsu Hijetta micro-caravan by Johns Cross Conversions started something of a sensation in the motorcaravan world. At the time it was hailed as the world's smallest motorcaravan and it was endorsed by Daihatsu UK and hundreds were sold through their dealer network.

With the launch of the facelift model Hijet, the Hijetta is widening its appeal. It now has an up-rated 1300cc 16 Valve EFI engine and a restructured, longer front.

The elevating roof Hijetta consists of two beds along each side, one a permanent bed/settee, the other easily dismantled and stored under the kitchen unit when not in use. The kitchen unit comprises a two burner hob and sink with two drawer-sized cupboards and storage space for mugs and plates.

A porta-potti and auxiliary battery come as standard and there is easy access to the camping gaz locker via the sliding door.

The Hijetta is small enough to be used as an everyday vehicle - yet it gives a surprising level of comfort for camping trips.

Johns Cross Conversions have simplified their trading name to JC Leisure but they are still producing their innovative, value for money conversion, the Hijetta.

Renault Kangoo Roo

A cosy motorhome for one or two with an easy action elevating roof. The Renault Kangoo Roo comes in 1149cc petrol or 1870cc Diesel versions. It features two 6 foot + beds with storage beneath, a small kitchen plus a porta-potti which is stored out of view when not in use. A small 12v cool-box can be provided in place of the porta-potti or as an optional extra. JC have provided an auxiliary battery as standard and a host of storage pockets throughout.

The kitchen has a two-burner hob, sink and tap, plus a handy slide out table which can be used as a quick table-top, coffee table, work surface or whatever! The load-bearing front seat can be transformed in seconds into a comfy rear-facing armchair giving extra leg-room for lounging. Or you can just put your feet up on the permanent bed-settee. There is also an island leg table for dining. Velour upholstery and full width velour curtains to all windows complete the cosy feel of the Roo.

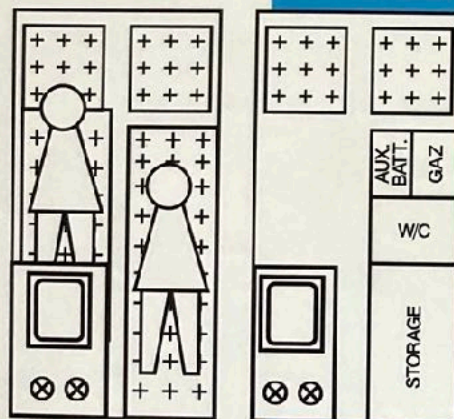

Renault have built the Kangoo with driver and passenger comfort in mind. The car-like cab features adjustable seats, a driver's air-bag, radio-cassette and speakers all as standard. There's also remote controlled central locking, tinted glass throughout, rear-wash wipe and heated rear windscreen. Other options are available including power steering, electric windows, passenger airbag and rear tailgate. The Roo is available in eight different colour finishes including white, metallic silver and metallic green.
