

The Romahome will accommodate up to three people in comfort*. Single berths on either side of the accommodation area allow the driver to stop and sleep while other members of the family can still cook, or sit and eat without disturbing him. Alternatively, the single berths can be formed into a large double bed within seconds by moving the two together.

The accommodation area is around eight feet long and five feet wide (2.44m x 1.52m). Despite this, the overall length of the vehicle is only 11ft 10ins (3.61m). Headroom in the galley is six feet (1.83m). Again, through thoughtful design, the overall height of the Romahome is only seven feet (2.13m). So you probably won't need any special garaging facilities either.

The cosy accommodation area is flock-lined. Furniture is colour-impregnated glass-fibre and, consequently, keeps servicing and maintenance costs to an absolute minimum.

Storage space has to be seen to be believed. Apart from the special compartments for cutlery and crockery, milk and eggs, there is additional space over the cab, both inside and outside, with built-in roof rack, a large wardrobe, and big trunks under the seats on either side of the accommodation area.

After cooking meals on the excellent two-burner cooker and grill, washing-up is easy with the handy sink unit and pump, all of which are standard. *If you should require a third berth, a bunk is available as an optional extra.

Romahome's new thinking has made it possible for you to enjoy inexpensive holidays for a very long time — year after year. And don't forget you have a family car, an estate car and a minibus, or even a truck for the rest of the time. All this, plus almost unsurpassed economy and reliability, and you have a dream. The Romahome.
